This questionnaire asks about your baby. We are interested to know about her health and behaviour. We also ask about you and your baby and the reaction of any other children you might have to the baby. Your answers will help us to understand the developing child and identify problems that babies and their parents have.

The questionnaire is like other questionnaires you have received. To answer simply tick the box which best describes your baby or your baby's situation. Some questions will seem similar but they are not the same. Please answer all questions that you can. If you cannot answer any question or a question does not apply to you please put a line through them. There are no right or wrong answers. Please just describe what happens in your situation. You may make additional comments at the end.
