The drawings below show stages of the way the breasts develop. A girl can go through each of the five stages shown, although some girls skip some stages. Please look at each of the drawings. It is also important to read the descriptions.

 qi_PhysDev_ii - PhysDev ii

Name qi_PhysDev_ii	Label PhysDev ii	Location Sequence › alspac_01_gac2_f › PHYSICAL DEVELOPMENT › SECTION B

Question

Put a tick in the box to the right of the drawing that is closest to your daughter's current breast stage.

Choices

1	The nipple is raised a little in this stage. The rest of the breast is still flat
2	This is the breast bud stage. In this stage the nipple is raised more than in stage 1. The breast is a small mound. The dark area around the nipple (areola) is larger than in stage 1
3	The areola and the breast are both larger than in stage 2. The areola does not stick out away from the breast
4	The areola and the nipple make up a mound that sticks up above the shape of the breast (Note: This stage may not happen at all for some girls. Some girls develop from stage 3 to stage 5 with no stage 4)
5	This is the mature adult stage. The breasts are fully developed. Only the nipple sticks out in this stage. The areola has moved back in the general shape of the breast
6	Not sure

The drawings below show different amounts of female pubic hair. A girl can go through each of the five stages shown. Please look at each of the drawings. It is also important to read the descriptions.

 qi_PhysDev_iii - PhysDev iii

Name qi_PhysDev_iii	Label PhysDev iii	Location Sequence › alspac_01_gac2_f › PHYSICAL DEVELOPMENT › SECTION C
Type Multiple Choice	Selection Type SelectOne	Display Style

Question

Put a tick in the box to the right of the drawing that is the closest to the amount of pubic hair your daughter has.

Choices

1	There is no pubic hair
2	There is a little long, lightly coloured hair. This may be straight or a little curly
3	The hair is darker in this stage. It is coarser and more curled. It has spread out and thinly covers a bigger area
4	The hair is now as dark, curly and coarse as that of an adult woman. However, the area that the hair covers is not as large as that of an adult woman. The hair has not spread out to the legs

5	The hair is now like an adult woman. It also covers the same area as that of an adult woman. The hair usually forms a triangular pattern as it spreads out to the legs
6	Not sure
