Purpose of this inquiry

 s_intro_ix

Name s_intro_ix	Location Sequence › nshd_57_iwm
Type Statement	

Statement Text

This child was enrolled at birth in a national survey which is being made by a Joint Committee of the Institute of Child Health, the Society of Medical Officers of Health and the Population Investigation Committee. The purpose of the present examination is to bring the medical and social history up to date. The children in this sample are representative of all births in England, Wales and Scotland. They are drawn from all social classes and during the first ten year of their lives only 8% of the original sample have been lost. The value of this inquiry depends on information being obtained for every possible survey child. The Joint Committee are therefore most anxious that this form should be completed.

s_intro_xi	
Name s_intro_xi	Location Sequence › nshd_57_iwm
Type Statement	

Statement Text

Five thousand Mothers scattered all over the country are being interviewed, and it is therefore important that the many hundreds of Health Visitors and School Nurses who are seeing them should record their findings in a comparable way. For this reason, and also to reduce the amount of clerical work, this form has been framed as a series of questions, many of which can be answered by one of several printed alternatives. All that is required is to put a circle round the number opposite the printed answer that most nearly describes your findings. If no alternative fits please write the answer in the space directly under the question. Similarly, if you feel that any printed answer, though applicable, does not fully explain your findings, we should be most grateful for any further information you can give us. In order to ensure that this information is obtained in the same way by the many people taking part in the survey, it is important that the wording and order of this form should be adhered to.
