2003 (Age 57)

Abstract

The target sample was 1,788 women cohort members. Postal questionnaires were sent out at ages 47, 48, 49, 50, 51, 52, 53, and 54 years, and a total of 1,572 women gave information on at least one of these occasions. Non-responders to the postal questionnaire who were interviewed at the home visit in 1999 completed a short questionnaire about menopause and hysterectomy that matched questions asked on the postal questionnaires. A further follow-up study took place at 57 years (N=1,387). In all, 1,735 women provided information on menopause and hysterectomy at one of these occasions. At 59 years those who had reported having a hysterectomy (N=374) were sent a questionnaire. In addition information was collected on confinements of women cohort members.

This short postal questionnaire is for everyone and we would appreciate you taking a few minutes to complete it. In order to continue our research on health and the menopause it is important that all women complete this questionnaire whether or not they have reached menopause or used hormone replacement therapy (HRT). When we last contacted women study members, one in eight were still perimenopausal and one in twenty remained premenopausal. In addition, many will have taken hormone replacement therapy since the last questionnaire and some will have had an operation to remove the uterus or ovaries. Thus this questionnaire updates menstrual, surgical and HRT histories. If there is little or nothing to report this will involve only a few questions but we still need to have the information to conduct our research.

We are delighted that so many women in the study complete the postal questionnaires. This has allowed us to publish widely on health topics of importance to women at midlife, including lifetime influences on timing of perimenopause and menopause, common symptoms and health care, breast cancer, and body dissatisfaction. Recent work is summarised on the birthday card and in our list of new publications. We are now incorporating this information on the menopause into our studies of earlier biological risk and lifetime social circumstances in relation to cardiovascular and musculoskeletal health and other measures of function.

WOMEN'S HEALTH IN THE MIDDLE YEARS

[s_intro_vi](#)

Postal Questionnaire 2003

[s_intro_vii](#)

This short postal questionnaire is for everyone and we would appreciate you taking a few minutes to complete it. In order to continue our research on health and the menopause it is important that all women complete this

questionnaire whether or not they have reached menopause or used hormone replacement therapy (HRT). When we last contacted women study members, one in eight were still perimenopausal and one in twenty remained premenopausal. In addition, many will have taken hormone replacement therapy since the last questionnaire and some will have had an operation to remove the uterus or ovaries. Thus this questionnaire updates menstrual, surgical and HRT histories. If there is little or nothing to report this will involve only a few questions but we still need to have the information to conduct our research.

[s_intro_viii](#)

We are delighted that so many women in the study complete the postal questionnaires. This has allowed us to publish widely on health topics of importance to women at midlife, including lifetime influences on timing of perimenopause and menopause, common symptoms and health care, breast cancer, and body dissatisfaction. Recent work is summarised on the birthday card and in our list of new publications. We are now incorporating this information on the menopause into our studies of earlier biological risk and lifetime social circumstances in relation to cardiovascular and musculoskeletal health and other measures of function.

[s_intro_ix](#)

When completing the questionnaire please use a pen to circle the appropriate response to each question and provide further details where requested. Please feel free to add any further explanations or comments that will help us to understand your particular experiences.

[s_intro_x](#)

All information you give us will be treated in the strictest confidence. If you have any queries please do not hesitate to telephone Diana Kuh or Rebecca Hardy or write to us at the above address.

[s_intro_xi](#)

When you have finished filling in the questionnaire please use the pre-paid envelope provided to post it back to us. Thank you very much for your time and cooperation.
