## 1954 (Age 8)

### Abstract

School nurses and health visitors interviewed mothers at home about the child's health and development, school absences, play, the mother's work and the home and family circumstances. Teachers administered cognitive tests at school. Topics covered included: accidents, illnesses, hospital admissions and out-patient visits, school clinic visits, absences, bed wetting, general health and behaviour, schooling, play and hobbies, the dwelling, the household, the mother's work, subsequent pregnancies and family history. Tests included a sentence reading test, a mechanical reading and comprehension test and a picture intelligence test.

This child was enrolled at birth in a national survey which is being made by a Joint Committee of the Institute of Child Health, the Society of Medical Officers of Health and the Population Investigation Committee. The purpose of the present examination is to bring the medical and social history up to date, to obtain further information about the school absences, and to check information previously noted.

Five thousand Mothers scattered all over the country are being interviewed, and it is therefore important that the many hundreds of Health Visitors and School Nurses who are seeing them should record their findings in a comparable way. For this reason, and also to reduce the amount of clerical work, this form has been framed as a series of questions, many of which can be answered by one of several printed alternatives. All that is required is to put a circle round the number opposite the printed answer that most nearly describes your findings. If no alternative fits please write the answer in the space directly under the question. Similarly, if you feel that any printed answer, though applicable, does not fully explain your findings, we should be most grateful for any further information you can give us.

IF THE FAMILY HAS MOVED TO ANOTHER AUTHORITY PLEASE ENTER THE NEW ADDRESS AND THE NAMES OF THE NEW L.E.A. AND NEW SCHOOL IN THE SPACE PROVIDED. IF THE CHILD CANNOT BE TRACED PLEASE ENTER THE LAST ADDRESS AND ANY OTHER INFORMATION THAT MIGHT HELP US TO TRACE HIM. IN EITHER CASE RETURN THE FORM TO WHOMEVER HAS BEEN DELEGATED BY THE SCHOOL MEDICAL OFFICER TO RECEIVE IT.

s\_intro\_x

Approach to the Mother

s\_intro\_xi

Remind her that in previous years she gave us most valuable information about herself and her child. We now want to find out what progress her child has made during the last year. All information she gives will, of course, be ABSOLUTELY CONFIDENTIAL.

s\_intro\_xii

Purpose of this inquiry

s\_intro\_xiii

This child was enrolled at birth in a national survey which is being made by a Joint Committee of the Institute of Child Health, the Society of Medical Officers of Health and the Population Investigation Committee. The purpose of the present examination is to bring the medical and social history up to date, to obtain further information about the school absences, and to check information previously noted.

s\_intro\_xiv

They are drawn from all social classes and during the first eight years of their lives only 8% of the original sample have been lost. The value of this inquiry depends on information being obtained for every possible survey child. The Joint Committee are therefore most anxious that this form should be completed.

s\_intro\_xv

How to fill in this form.

s\_intro\_xvi

Five thousand Mothers scattered all over the country are being interviewed, and it is therefore important that the many hundreds of Health Visitors and School Nurses who are seeing them should record their findings in a comparable way. For this reason, and also to reduce the amount of clerical work, this form has been framed as a series of questions, many of which can be answered by one of several printed alternatives. All that is required is to put a circle round the number opposite the printed answer that most nearly describes your findings. If no alternative fits please write the answer in the space directly under the question. Similarly, if you feel that any printed answer, though applicable, does not fully explain your findings, we should be most grateful for any further information you can give us.

s\_intro\_xvii

In order to ensure that this information is obtained in the same way by the many people taking part in the survey, it is important that the wording and order of this form should be adhered to.

s\_intro\_xviii

COMPLETED FORMS SHOULD BE RETURNED TO THE SCHOOL MEDICAL OFFICER AND NOT DIRECTLY TO THE JOINT COMMITTEE.

s\_intro\_xix

RING THE CODE NUMBER OPPOSITE THE MOTHER'S ANSWER. IF NO ANSWER IS GIVEN, OR IF A QUESTION DOES NOT APPLY, STRIKE IT THROUGH.

Statement	

**Statement Text**

This child was enrolled at birth in a national survey which is being made by a Joint Committee of the Institute of Child Health, the Society of Medical Officers of Health and the Population Investigation Committee. The purpose of the present examination is to bring the medical and social history up to date, to obtain further information about the school absences, and to check information previously noted.

They are drawn from all social classes and during the first eight years of their lives only 8% of the original sample have been lost. The value of this inquiry depends on information being obtained for every possible survey child. The Joint Committee are therefore most anxious that this form should be completed.

Five thousand Mothers scattered all over the country are being interviewed, and it is therefore important that the many hundreds of Health Visitors and School Nurses who are seeing them should record their findings in a comparable way. For this reason, and also to reduce the amount of clerical work, this form has been framed as a series of questions, many of which can be answered by one of several printed alternatives. All that is required is to put a circle round the number opposite the printed answer that most nearly describes your

findings. If no alternative fits please write the answer in the space directly under the question. Similarly, if you feel that any printed answer, though applicable, does not fully explain your findings, we should be most grateful for any further information you can give us.
