 Birth Records

Abstract

From 1911 to 1948, health visitors recorded information on birth weight and weight at one year on infants born in Hertfordshire. In 1998, those born between 1931-1939 were traced through the National Health Service central register and a total of 3822 men and 3284 women were found to still live in the county. They were approached to participate in studies examining the interactions between early life, diet, adult lifestyle, and genetic factors as determinants of adult disease as follows: Permission to contact 3126 (82%) men and 2973 (91%) women was obtained from their General Practitioners.

Title

Birth Records

Creator

Professor Cyrus Cooper

Publisher

MRC Lifecourse Epidemiology Unit, University of Southampton

Sample

hcs_sweep - HCS Sweep Population

HCS Sweep Population

All births in Hertfordshire between 1931 and 1939 for people who were still resident and registered with a GP in Hertfordshire in the 1990's.

LifeStage

Pregnancy, birth and infancy

LifeStageDescription

Pregnancy - 1 year

Date	1931 - 1939
Spatial Coverage	All participants were born and remain resident in the county of Hertfordshire.
Highest Level	County
Lowest Level	Postcode
Country	GB-ENG

Data Collection

hcs_birth - Birth Records

Birth Records

Collection Events

1931 - 1939

Collection Organization

Mode of Collection

Collecting and assembling data from multiple, often heterogeneous sources that have one or more reference points in common, and at least one of the sources was originally produced for other purposes.
