## Phase 10

### Abstract

Women and their children in the extensive sample were visited at home to complete a follow up questionnaire and a range of filmed observational assessments (e.g. mother-child interaction and child executive functioning tasks) at approximately 3.5 years of age. Partner's also completed a follow up questionnaire. Domains of measurement include; parental and child mental health, physical health, demographic change, infant temperament, lifestyle and relationship information, life events, parenting, infant behaviour. S

#### Title

Phase 10

#### Creator

Professor Jonathan Hill (University of Reading), Professor Helen Sharp (University of Liverpool)

#### Publisher

University of Liverpool

### Sample

WCHADS\_phase\_10 - WCHADS Phase 10 Population

WCHADS Phase 10 Population

WCHADS extensive sample (includes intensive subsample) - mother, child and partner

#### LifeStage

Early years

#### LifeStageDescription

13 months - 4 years

Date	2011 - 2013
Spatial Coverage	Wirral, Merseyside, England
Highest Level	Country
Lowest Level	Address
Country	GB-ENG

## Data Collection

wchads\_11\_ph10mx - WCHADS Phase 10 Mother Child Assessment

WCHADS Phase 10 Mother Child Assessment

Collection Events

2011 - 2013

Collection Organization

### **Mode of Collection**

Research method that involves observing and collecting data as they occur without attempting to manipulate any of the independent variables. Observation conducted in a natural environment. The researcher interacts with the subjects and often plays a role in the situation under observation.

### **Mode of Collection**

Assessment of personality traits or psychological/behavioural responses by means of specialised measures or tests.

### **Mode of Collection**

Self-administered survey using a traditional paper questionnaire.
