## Phase 14

### Abstract

Mothers and their children in the full extensive sample were invited to the lab to complete a follow up questionnaire and a range of developmental and filmed observational assessments at approximately 9 years of age. Partner's also completed a follow up questionnaire. Domains of measurement include; parental and child mental health, physical health, demographic change, child temperament, parental lifestyle and relationship information, life events, parenting, peer relationships, activities, child behaviour, personality. For the full extensive sample teachers were approached and reported on a range of aspects of functioning in school including; school performance, peer relationships, child mental health and wellbeing.

#### Title

Phase 14

#### Creator

Professor Jonathan Hill (University of Reading), Professor Helen Sharp (University of Liverpool)

#### Publisher

University of Liverpool

### Sample

WCHADS\_phase\_14 - WCHADS Phase 14 Population

WCHADS Phase 14 Population

WCHADS extensive sample (includes intensive subsample) - mothers, partners and child

#### LifeStage

Childhood

#### LifeStageDescription

5 - 12 years

Date	2017 - 2019
Spatial Coverage	Wirral, Merseyside, England
Highest Level	Country
Lowest Level	Address
Country	GB-ENG

## Data Collection

wchads\_17\_ph14mimx - WCHADS Phase 14 Mother Questionnaire

WCHADS Phase 14 Mother Questionnaire

Collection Events

2017 - 2019

Collection Organization

### **Mode of Collection**

Research method that involves observing and collecting data as they occur without attempting to manipulate any of the independent variables. Observation is conducted in a controlled, artificially created setting. The researcher interacts with the subjects and often plays a role in the situation under observation.

### **Mode of Collection**

Assessment of personality traits or psychological/behavioural responses by means of specialised measures or tests.

### **Mode of Collection**

Self-administered survey using a traditional paper questionnaire.

### **Mode of Collection**

Computer assisted self-interview (CASI). Respondents enter the responses into a computer by themselves.
